

Digital Devices Limited

ISO/IEC 27001:2022

Information Security Policy

Digital Devices Ltd. is committed to protecting its information assets and those entrusted to us by our customers and partners. To this end, we have established, implemented, and maintain an Information Security Management System (ISMS) in line with the requirements of ISO/IEC 27001.

The key principles of our information security commitment are:

- *We are dedicated to ensuring the confidentiality, integrity, and availability of all information assets within our scope of "Reseller of IT Infrastructure Equipment and Cloud Services." This includes protecting customer data, supplier information, and corporate intellectual property from unauthorized access, modification, or destruction.*
- *DD's ISMS is designed to ensure compliance with all applicable legal, statutory, regulatory, and contractual requirements related to information security and data protection.*
- *We employ a systematic risk management process to identify, assess, and treat information security risks to a level acceptable to the company, thereby safeguarding our operations and service delivery.*
- *Business continuity plans, including disaster recovery procedures, are established, maintained, and tested regularly to ensure the resilience of our critical business functions.*
- *All personnel are provided with regular information security training and are aware of their responsibilities in upholding this policy and protecting our information assets.*

This policy demonstrates the unwavering commitment of Digital Devices Ltd. to maintaining a secure and resilient operational environment for our customers, partners, and employees.
